Objective

Dedicated final year B.Tech CSE student with a strong foundation in programming, database management. Seeking an entry-level position to apply my technical skills, problem-solving abilities, and passion for software development in a dynamic IT environment.

Education Qualification

- B.Tech in Computer Science from Kakatiya University with 8.8 CGPA
- Intermediate from Shiridi Sai Mahila Jr College with 95%
- SSC from Vijay Sai High School with 9.7 GPA

Projects

Mini Project

Personal Portfolio

refers to a collection of work, projects, and achievements that an individual has compiled to showcase their skills, experience, and accomplishments. Personal portfolios are commonly used by professionals in various fields to demonstrate their capabilities, whether in the context of seeking employment, freelance opportunities, or personal branding. Here are a few common types of personal portfolios:

Major Project

College Event Management System

Developing a comprehensive event management system for the college to streamline the planning, organization, and execution of various campus events. The system aims to enhance communication, coordination, and engagement among students, faculty, and attendees.

Technical Expertise

- Proficient in Python
- Familiarity with Data Structures and Algorithms
- Basic knowledge of SQL
- HTML
- CSS
- Problem solving skills

Achievements

I participated in the **Virtusa Women's Coding Contest** and was selected to participate in the hackathon. I received a certificate for my participation in the hackathon, where I was among the 100 members selected out of 67,000 participants from across India.
